- 1.) Perm do the plan and investigate a line of flight outside of Neoliberalism---the 1AC is compatible with the method of the alt
- 2.) The Alt cedes the political --- populist agents seize control if the left disengages form institutions
- 3.) The Alt is Utopian---Utopian fiat is a voting issue--it's unpredictable and skews the debate away from discussions oaf the AFF
- 4.) Weigh the impacts of the case against the kritik--it's the only predictable standard---anything else moots the 1AC and skews the debate away from the question of the desirability of the plan
- 5.) No Link---the AFF's negative state action approach is a drop in the bucket and nowhere near their link threshold
- 6.) The Alt Can't Solve---lines of flight don't take into consideration those who have perspectives outside of those performing the critique --- leads to essentialism
- 7.) The Alt can't solve the AFF --- the method of the alt doesn't lead to the same policy implementations
