

Name: _____

CONSTRUCT A PF CASE!

Resolved: The United States should replace means-tested welfare programs with a universal basic income.

After researching the topic for a week or two, you are looking to begin the case writing process. Below, we have outlined some of the various arguments and pieces of evidence you found. Put them together into a proper PF case structure format, with arguments that are cohesive and work together!

Here are the various arguments you found in research and ideas you brainstormed!

Write a PRO or CON case!

study: welfare lowered the poverty gap by over 60%

a universal basic income removes the stigma around welfare

means-tested welfare is discriminatory

welfare disincentives lower income families from improving their economic condition because they'll lose their benefits

welfare is beneficial and effective - research shows programs like SNAP & Medicaid have helped millions

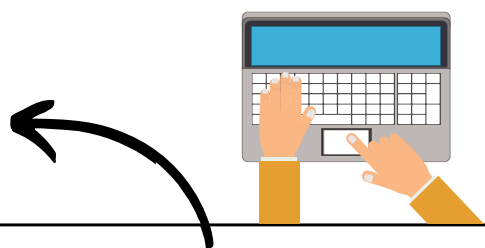

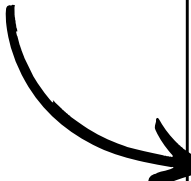

a study that found targeted programs are more beneficial to lower income households

a UBI is too expensive - we can't pay for it and/or it'd drive up debt

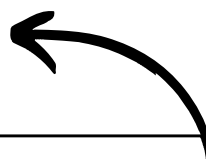

a UBI is regressive and untargeted - many recipients aren't the ones in need

a UBI can help victims of domestic violence escape their abuser

a study that found UBI causes economic growth

Using the research and ideas you found, put together a Public Forum debate case, using the proper structure and format you were taught. Be sure to try and make the arguments cohesive and that they work well together!

Large empty box for writing the case.
