

Name: _____

Impact Calc

Make an argument for why the judge should prefer an impact that has high magnitude but low probability OVER an impact that has a big scope but longer timeframe. Incorporate all 4 aspects (magnitude, probability, scope, and timeframe) in your analysis.

Give 2 reasons why a judge should prefer an argument that leads to nuclear war over one that links to climate change.

NOW FLIP: Give 2 reasons why a judge should prefer an argument that leads to climate change over one that links to nuclear war.

1. You shouldn't do impact calc if you believe you won an argument.

True False

2. Weighing is another argument on the flow.

True False
