# STANDARDS FOR PROCEDURALS

## FILL IN THE BLANKS:

1. The standard that argues what your opponent did is wrong because it harmed your ability to form a coherent strategy for the round is called \_\_\_\_\_.

2. Debaters may argue that an action or argument leads to less \_\_\_\_\_ because it reduces substantive engagement with arguments.

3. Knowledge that is gathered from doing research on topic-specific literature and debating core positions on the topic is known as \_\_\_\_\_.

4. \_\_\_\_\_ is the standard that holds the violation harmed the quality and/or quantity of arguments that one side could make.

5. \_\_\_\_\_ are the bounds of affirmative positions than can be legitimately debated on a topic.

6. The standard that argues that the benefits of debate extend outside the scope of the round into \_\_\_\_\_. As a result, we should do things that would be good for that type of learning.
