"My opponent argues that eliminating nuclear arsenals will decrease conventional warfare. However, look to the study I cite in case by Rauchhaus 2016 that empirically found nuclear weapons increase the probability of war."

"On their C2, they tell you predictive policing leads to racist results. But, I tell you that algorithms, while not perfect, are better than allowing officers to "follow their gut" because, as my card shows, that can be even more discriminatory."

"In their last speech, NEG tries to tell you that if we don't subsidize fossil fuels, people will switch to coal because its cheaper. But that isn't true - recall the analysis I cited that shows renewables are way cheaper than any alternative."
